

Serial No. 10/812,137  
Amendment Under 37 CFR §1.116  
Response to Final Rejection dated March 8, 2006

**Amendment to the Claims:**

This listing of claims will replace all prior versions, and listings, of the claims in the application:

**Listing of Claims:**

Claims 1-32 (canceled)

Claim 33 (previously presented) : The process of claim 43 wherein the nylon film and sealant film are coextruded.

Claim 34 (previously presented): The process of claim 43 wherein the nylon film and sealant film are laminated together optionally via an intermediate adhesive.

Claim 35 (original): The process of claim 34 wherein the nylon film is biaxially oriented.

Claim 36 (previously presented): The process of claim 43 wherein an antifog composition is incorporated in the sealant film.

Claim 37 (currently amended): The process of claim 43 wherein an antifog composition is coated onto said first ~~second~~ surface of the sealant film.

Claims 38-42 (canceled)

Claim 43 (currently amended): A process for forming a multilayered film including a layer comprising an antifog composition, said process comprising:

- (a) providing a sealant film having first and second surfaces, said sealant film having an antifog composition which is either incorporated therein or coated on said first surface of said sealant film;
- (b) providing a nylon film having first and second surfaces;
- (c) adhering said second surface of said sealant film to said first surface of said nylon

Serial No. 10/812,137  
Amendment Under 37 CFR §1.116  
Response to Final Rejection dated March 8, 2006

film;

(d) adhering a protective film comprising a polyurethane to said second surface of said nylon film, ~~said protective film being selected from the group consisting of polyvinylidene chloride, polyurethanes, amine modified polyurethanes, epoxies, polyesters, acrylics, polyols and combinations thereof; and~~

(e) winding said multilayered film into a roll, wherein said protective film of one layer of said roll is in contact with said sealant layer of an adjacent layer of said roll, whereby said protective film prevents said antifog composition of said sealant film of said one layer from migrating into said nylon film of said adjacent layer of said roll.

Claims 44-45 (canceled)

Claim 46 (previously presented): The process of claim 43 wherein said multilayered film consists essentially of said sealant film, said nylon film and said protective film.

Claim 47 (previously presented): The process of claim 43 wherein said sealant film comprises polyethylene.

Claim 48 (previously presented): The process of claim 43 wherein said nylon comprises nylon 6.

Claim 49 (previously presented): The process of claim 43 wherein said nylon film comprises a combination of a first nylon layer, an ethylene vinyl alcohol layer, and a second nylon layer.

Claim 50 (previously presented): The process of claim 43 wherein said multilayered film is heat shrinkable.

Claims 51-54 (canceled)
